

## Optional Pre-Conference Training

---

### Level 3: Corepoint Integration Engine

Monday & Tuesday (October 7-8), 9:00 AM – 4:00 PM

Cost: \$2,000

This training class focuses on optimizing your interfaces, processes, workflows, and environment.

In this instructor-led, two-day class, we dissect Action Lists to measurably improve their performance, resulting in faster throughput and more efficient development time. Learn how Test Coverage and Test Collections can improve Action List testing and how to optimize alert configurations to ensure the right people get notified at the right times for each interface. Use the graphs and metrics in the Monitor to drive decision making and alert us to potential areas of optimization.

At the end of this class, you will be equipped to go back to your organization with a checklist of ways to optimize your interfaces and development practices. ([View Class Outline](#))

---

### Rev Your Engine 2019: Leverage the Full Potential of Corepoint

Monday & Tuesday (October 7-8), 9:00 AM – 4:00 PM

Cost: \$2,000

No matter what version of Corepoint Integration Engine you are currently using, this class will help you *rev your engine* and ensure you're using it to its full potential. We will be hands-on in version 7.2+ for this two-day, interactive class while we explore features available in 5.x through the current release.

Whether you use the engine daily or occasionally to modify or add an interface, this class gives you the tools and confidence to deliver on more of your organization's interfacing needs. ([View Class Outline](#))

### HL7 FHIR: The Future of Health Data Exchange

Wednesday (October 9), 8:00 AM – 12:00 PM

Cost: \$700

In this special edition FHIR standards class, we combine training from our FHIR: First Steps with product demonstrations to show how Corepoint Integration Engine communicates with a FHIR server.

HL7 FHIR is an emerging standard in healthcare integration, and Corepoint Health is taking a lead role in helping customers support this new messaging standard. You will learn how to use FHIR resources in your workflows explore the FHIR website through several practice exercises.

- FHIR Timeline & Versions
- All About Resources
- Exploring FHIR Specifications
- Encoding FHIR Data
- FHIR Extensions
- Introduction to RESTful Web Services
- Using the FHIR Test Servers
- Searching for FHIR Data
- Using Implementer Tools
- FHIR Demonstration in Corepoint
