## A POWERFUL COMBINATION: MEDINFORMATIX AND COREPOINT INTEGRATION ENGINE

# Data Integration Features Deliver True Partnership and Value to Referral Community

### Corepoint Integration Engine is at the center of everything they do

A key factor Joe Moore, CIO at Radiology Consultants of Iowa, looks for when choosing a new health IT

ONC, making it possible for Radiology Consultants of Iowa to successfully qualify for Meaningful Use reimbursement in 2012.

“If I drew a picture of just about anything we do, Corepoint Health would be in the middle. It is central. I don’t know if it’s our most mission critical technology, but it’s right up there—

it makes everything work. Without it, we’ve basically got nothing.”

Joe Moore, CIO at Radiology Consultants of Iowa

Mr. Moore also looks for features and functionality that allow his organization to improve their operations and help differentiate their reports and services to the referring medical community, and that’s why he has placed Corepoint Integration Engine in the center of their IT environment.

“Corepoint Health allows us to take in multiple feeds from 19 different facilities, normalize those feeds, and integrate dictation and PACS to create an efficient workflow for the radiologists that allows our organization to meet our service model commitments with the best, and most accurate turnaround times of all our competitors. When you look at the statistics we beat the pants off of everybody, it’s not even close.”

vendor is if the vendor actually develops and supports every feature offered in their product. Vendors that add features by acquisition typically produce clunky products that simply do not work well together. That’s one of the main reasons RCI chose Corepoint Integration Engine for all his data integration needs and MedInformatix for his RIS.

Fortunately, both products are Meaningful Use certified by the

KNOW

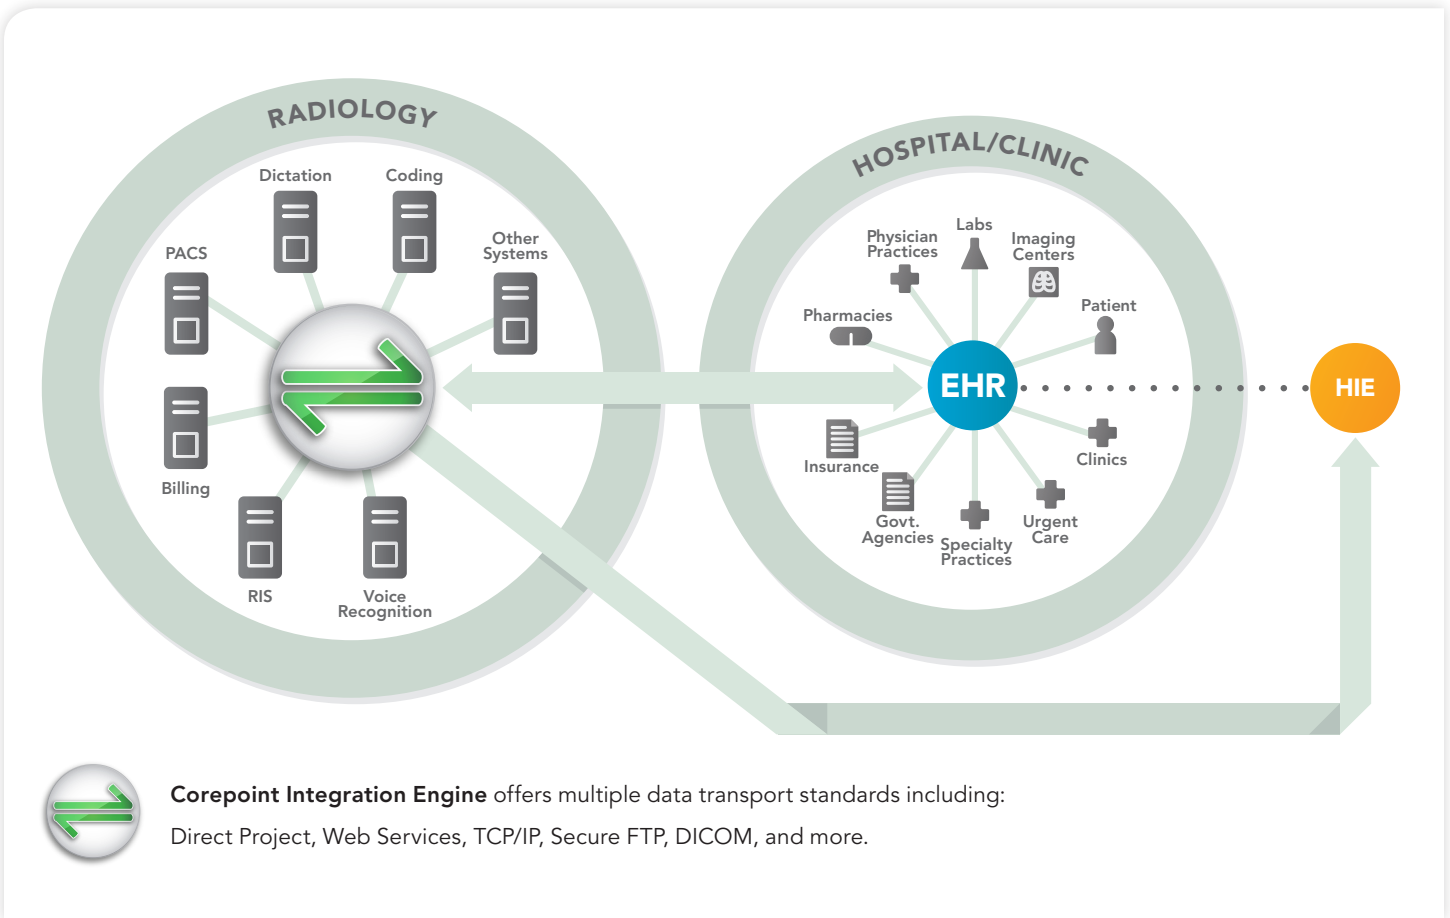

#### Key facts about Radiology Consultants of Iowa

- 7 Clinics
- 34 Radiologists
- 20 Business partners electronically connected
- RIS: Medinformatix v7.5

## Radiology Workflow

### Key ways Radiology Consultants of Iowa use Corepoint Integration Engine to improve operations:

- Dramatically improved billing efficiency by sending clinical reports directly from Corepoint Integration Engine to CodeRight.
- Created a true partnership with the referring community by seamlessly integrating with existing EHR systems. Business partners seamlessly connect to RCI without the need for additional programs or troublesome workarounds.
- Sends every RIS message and radiology report through Corepoint Integration Engine to be populated into a quality assurance database, which puts Radiology Consultants of Iowa ahead of the curve for quality-based reimbursement.
- Support staff easily manipulate messages to maintain workflow operations so RCI can provide premium services to their referring community.
